LETTER OF RECOMMENDATION

I am highly delighted to write this letter of recommendation for my fervently enthusiastic student **Mr. Safiullah Sheriff S.A (Roll No. 1132181)**, who is applying for master's degree in your esteemed institute. I have been the Head of the department of Mechanical Engineering. Though I haven't taught him, I got know about him due to his active participation in the project expos and project competitions.

Safiullah is very unique from others and incomparably knowledgeable. He is one of the very few students I got to know in this college and probably the best student I have seen as I couldn't know all the students except the outstanding performers of the college like him. He is one of the toppers of our department who has a complete grip of both academic and technical knowledge.

It is with delight I strongly recommend one of our proficient students Mr. Safiullah to master's program at your prominent. He is an aspiring talent and I am confident that he will set himself unique and excel in all his work. I can vouch for his caliber and innate curiosity, which are the essential to take up a master's level program. He will be incredibly a credit to your program.
